DETAILED ACTION

Claims 1-70 are pending in this application.

Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 20-70, 7-9, 16-19 and 1-6 (in part), 10-15 (in part), drawn to compounds of formula I' [or formula I wherein Q is -CO₂-, -C(O)NR⁷- or -S(O)₂NR⁷-] wherein Z¹ is N and Z² is C, corresponding composition and method of use, classified in class 544 and subclass 242+.
- II. Claims 20-31, 41-70, 1-6, and 10-15 (all in part), drawn to compounds of formula I' [or formula I wherein Q is -CO₂-, -C(O)NR⁷- or -S(O)₂NR⁷-] wherein Z¹ is C and Z² is N, corresponding composition and method of use, classified in class 544 and subclass 224+.
- III. Claims 20-31, 41-70, 1-6, and 10-15 (all in part), drawn to compounds of formula I' [or formula I wherein Q is -CO₂-, -C(O)NR⁷- or -S(O)₂NR⁷-] wherein Z¹ and Z² are N, corresponding composition and method of use, classified in class 544 and subclass 182+.
- IV. Claims 20-31, 41-70, 1-6, and 10-15 (all in part), drawn to compounds of formula I' [or formula I wherein Q is -CO₂-, -C(O)NR⁷- or -S(O)₂NR⁷-] wherein Z¹ and Z²

Art Unit: 1624

are C, corresponding composition and method of use, classified in class 546 and subclasses various.

- V. Claims 1-6 and 10-15 (all in part), drawn to a method of use of compounds of formula I wherein Q is other than $-\text{CO}_2-$, $-\text{C}(\text{O})\text{NR}^7-$ or $-\text{S}(\text{O})_2\text{NR}^7-$; Z^1 is N and Z^2 is C, classified in class 514, subclasses various.
- VI. Claims 1-6 and 10-15 (all in part), drawn to a method of use of compounds of formula I wherein Q is other than $-\text{CO}_2-$, $-\text{C}(\text{O})\text{NR}^7-$ or $-\text{S}(\text{O})_2\text{NR}^7-$; Z^1 is C and Z^2 is N, classified in class 514, subclasses various.
- VII. Claims 1-6 and 10-15 (all in part), drawn to a method of use of compounds of formula I wherein Q is other than $-\text{CO}_2-$, $-\text{C}(\text{O})\text{NR}^7-$ or $-\text{S}(\text{O})_2\text{NR}^7-$; Z^1 and Z^2 are N, classified in class 514, subclasses various.
- VIII. Claims 1-6 and 10-15 (all in part), drawn to a method of use of compounds of formula I wherein Q is other than $-\text{CO}_2-$, $-\text{C}(\text{O})\text{NR}^7-$ or $-\text{S}(\text{O})_2\text{NR}^7-$; Z^1 and Z^2 are C, classified in class 514, subclasses various.

The inventions are distinct, each from the other because of the following reasons:

Groups I-IV are drawn to structurally dissimilar compounds. They are made independently and used independently. They would be expected to raise different issues of patentability if a compound of Group I, consisting of pyrimidinyl compounds were anticipated, the anticipatory reference would not necessarily render obvious the compounds of Groups II-IV or vice-versa. They are not art recognized equivalents, they are classified separately and require

Art Unit: 1624

separate searches in the literature. Also inventions of Groups V-VIII are drawn to methods of use of structurally dissimilar compounds.

Inventions I-IV and V-VIII are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions and/or effects and involve structurally different compounds.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Claims 1-70 are generic to a plurality of disclosed patentably distinct species comprising the species disclosed in the specification. In addition to the election of a single invention from above, applicant is required under 35 U.S.C. 121 to **elect a single disclosed species falling within the elected group**, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 1624

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
